TUNE IN TO CATCH TRAFFICMASTER TRAVEL NEWS ON YOUR LOCAL RADIO

Drivers are now able to tune in and catch travel news from Trafficmaster's unique traffic monitoring network on the local radio network, thanks to a deal between Trafficmaster and GCap Media, owners of Classic FM, London's 95.8 Capital FM and 37 local radio stations* across the UK.

From February 2007, peak-time travel bulletins across the GCap network will feature up-to-the-minute local information directly from Trafficmaster's UK Control Centre, in Cranfield Bedfordshire, to help keep drivers ahead of the latest jams. Trafficmaster's network comprises 7,500 sensor sites across the UK, covering 8,000 miles of Britain's motorways and A-roads.

GCap Media's Hugh Broom, travel news reporter on Capital FM, said: "Up to date information across our stations could make the difference between sitting in that jam and avoiding it. Trafficmaster travel news will be critical to keeping our listeners moving."

Craig Blount, Director of Trafficmaster Services, said: "Our aim is to give drivers the best possible travel information, wherever they are. Like our network, GCap covers the whole UK, so motorists can make use of Trafficmaster news, wherever they are."

About Trafficmaster

Trafficmaster is an expert in intelligent driving. The Group comprises US-based Teletrac Inc. and Trafficmaster Plc in the UK. Both organisations focus on intelligent vehicle services which enhance the driving experience and improve business performance by saving companies' and drivers' time and money and reducing their environmental impact.

Teletrac Inc offers fleet tracking, management and navigation solutions under the Fleet Director brand across the US, serving 4,000 fleets and a total of 55,000 commercial vehicles, using wireless and GPS technology.

The group has also developed a suite of Trafficmaster services in the UK. Trafficmaster's key product is the award-winning Smartnav, an intelligent satellite navigation system, which uses live traffic information and real-time road speeds to calculate optimum routes and avoid traffic congestion on the way. Trafficmaster's comprehensive traffic

data means Smartnav is continually updated with traffic information, road closures and speed camera locations, without the need for CDs or internet-sourced updates.

Trafficmaster also offers Trackstar stolen vehicle tracking, monitored 24 hours a day in the Trafficmaster Control Centre. Stolen vehicles can automatically inform Trafficmaster and are then monitored remotely and police informed of their whereabouts for fast and efficient recovery.

The company provides live traffic information direct via mobile phone services and Radio Data System -Traffic Message Channel (RDS TMC) to other aftermarket and factory-fit satellite navigation systems.

Trafficmaster also maintains a unique traffic monitoring network of 7,500 sensors, covering 8,000 miles of UK motorways and trunk roads.

Trafficmaster was founded in 1988 and floated on the London Stock Exchange in 1994. Teletrac Inc is a wholly owned US subsidiary company.
