

# Preparing your PC for Fleet Director

Fleet director e-client is a Microsoft Internet Explorer based application, so to make the most of e-client it is important to ensure that you are using the most up to date versions of the following software packages \*\*\* (They are all free and easily obtainable on-line):

- **Internet explorer**
- **Sun Java**
- **Adobe Acrobat**

\*\*\* Please check with the person responsible for your IT infrastructure before downloading and installing any software.

<http://www.microsoft.com/windows/downloads/ie/getitnow.msp> will take you to the Microsoft download page for **Internet Explorer 7** (Internet explorer 6 or later is required)

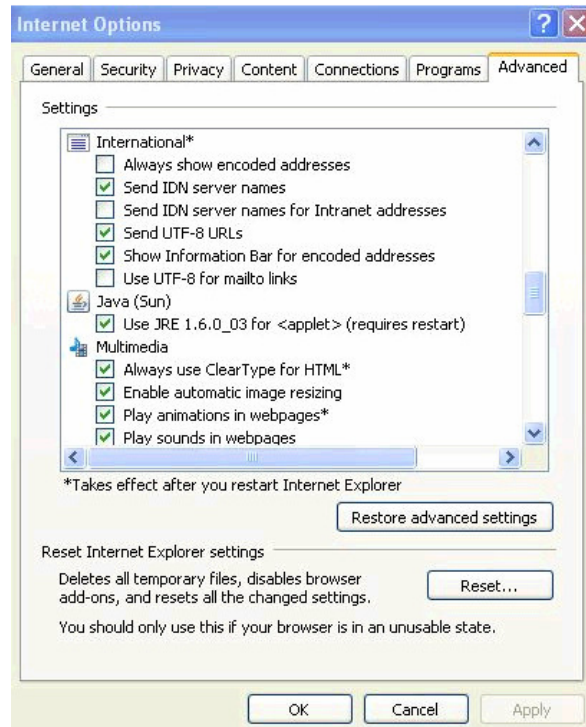

[www.java.com](http://www.java.com) and follow the download and install instructions to get the latest **Java**

<http://www.adobe.com/products/acrobat/readstep2.html> and follow download instructions to that the latest version of **Adobe Acrobat**.

You will also need to check the security permissions on your internet explorer browser to ensure that **Java** is enabled.

To do this:

- Open up internet explorer
- Click on tools on the menu bar
- Scroll down till you see the Java (Sun) logo. (Looks a bit like a cup of coffee)
- Make sure that the tick box next to the logo is ticked.
